

Dear FCC officer,

I can't believe this BPL is even in consideration.=A0 Broadband interference will destroy the radio spectrum for all users and, under the right conditions, propagate throughout the world.=A0 Bare assertions that there is no interference are unfounded and untrue.=A0 Common sense tells anyone of even modest radio experience that BPL is a hazard to all HF communication.=A0

There are plenty of other ways to get broadband into homes and businesses.
=A0

We don't need to destroy a precious resource (the world-wide radio spectrum) to experiment with an unneeded technology which has already failed in Europe.
=A0

Craig Buck
